

Asset Management Toolkit  
VST Morning meeting - CDL walk around inspection

Goals:  
Perform a CDL truck daily inspection

What do I need?  
Inspection sheet  
Pen  
Flashlight  
Rag

Flow:  
CDL daily inspection is a requirement for safe operation of a CDL required vehicle.

15 minutes to do a walk around on the truck Document deficiencies.

Check cab for all necessary equipment:  
1 Fire Extinguisher  
2 Warning triangles  
3 First Aid kit  
4 personal gear winter/summer as needed

Document deficiencies on inspection form If repairs are needed document and turn into Maintenance Garage for repair

IF the deficiencies are A DOT required item stop operation and get deficiencies repaired or fixed before operation

Why We care? One it is a requirement that we complete these items for our safety and the safety of those on the road around us.

Also, it is a good practice to communicate your concerns with your fellow operators, so everyone is aware of issues and/or developing problems.

Notes:  
This is not only a requirement to keep you safe and others safe but also the next team member that will use that piece of equipment.

Please communicate with each other and seek guidance; if you are not sure if it is an issue ask other drivers or the mechanics.

Also please document the deficiencies and turn in the inspection sheets.
