

**Name of your VST:**

**VST Electrical Lockout Tagout 2021**

**Goals:**

The crew should be able to identify circumstances where lockout / tagout kits should be used, properly select the correct device for equipment being secured from service and demonstrate the use of the device.

**What do I need?**

Equipped lockout tagout kit.

Accessible breaker panel, switch device or cord/connector to apply lockout devices to.

Statistics of incidents involving high voltage electrical injuries from servicing energized systems.

Photos of properly secured maintenance tasks, or websites that can be reviewed independently.

**Flow**

Ask individuals about their understanding and have them identify potential applications of LOTO devices on their daily electrical work tasks.

Talk about industry occurrences of LOTO lapses and subsequent injuries.

Show photos or share literature of devices and their proper application.

Demonstrate local device application on a feature for understanding purposes.

Expand upon electrical LOTO with other control interlock applications, Plumbing, Mechanical, Machinery connection.

**Notes**

Ask about instances or knowledge of issues where LOTO could have been employed to minimize hazard occurrences.

Conduct training near applicable uses of LOTO.

30 minutes of time to demonstrate and allow crew to also exhibit learning of LOTO kit usage.
