

Asset Management Toolkit

Name of VST:

Pre-Trip Inspections on Fleet and Equipment

Goals:

At the end of this training employees should be able to:

Identify why pre-trip inspections are important to maintain safe vehicles and equipment.

Conduct pre-trip inspections using provided checklists and learn to identify and correct deficiencies.

Understand that if it's not safe... Don't use it! and tell a supervisor or someone who can fix it if they can't!

What do I need?

Handouts, Inspection checklists, Policy Reference

Flow:

Open: Ask why is it important to conduct pre-trip inspections?

Tell: Pre-trip inspections are important to ensure that your vehicle is safe before you use it.

Evidence: "Statistics indicate that X number of people were injured in 20XX by unknown or overlooked faulty equipment"

The form... go over it and do a demonstration on something in the shop.

Open the floor for questions....

Conclude.
